

**Dr. Sadri Znaidi**

Assistant Biologist

Laboratory of Molecular Microbiology, Vaccinology and  
Biotechnological Development

Pasteur Institute of Tunis

I am a biochemist (B.Sc., M.Sc. from the University of Sherbrooke, Canada) and molecular biologist (Ph.D., from the University of Montreal, Canada), with expertise in yeast genetics and functional genomics. I am currently a RIIP (Institut Pasteur International Network) Affiliate Program Fellow, with affiliations at the Institut Pasteur in Tunis and Paris. My current work focuses on the implementation of functional genomics approaches and large-scale phenotypic assays to identify and characterize biological circuitries involved in the interaction of fungal pathogens with their host.
